

AUSTRALASIAN BAT SOCIETY

The ABS is the peak body promoting bat conservation in the Australasian region.

Our primary aim is to promote the conservation of bats and their habitats through the advancement of quality science and the extensive experience of our members.

We recognise the intrinsic value of all bat species, their key ecological roles, and their place in our natural heritage.

ABS membership includes scientists, natural resource managers, ecological consultants, educators, students, wildlife rehabilitators, and members of the general public.

CONSERVATION

Promoting the conservation of Australasia's unique bat fauna

RESEARCH

Supporting research to advance our understanding of bats

EDUCATION

Improving knowledge of bats through education

COMMUNITY

Working as a community to learn, share, and enjoy
